ABOUT ME

I am highly motivated with a desire to create efficient, scalable and reliable backend software. I graduated from the Technical Faculty "Mihajlo Pupin", Zrenjanin. With college experience and previous internships, I have developed a solid foundation in back-end development, specializing in the .NET framework, C#, and database management.

I am experienced and proficient in C#, .NET Framework, ASP.NET Core, Entity Framework, SQL and database design, RESTful API development, Git and version control, Postman, Swagger, Scrum, etc. I am currently improving my knowledge of frontend programming, primarily Angular.

Currently, I am seeking new opportunities to leverage my skills and contribute to exciting and challenging projects. I am dedicated to continuous learning and professional growth, actively engaging in online courses, and keeping up-to-date with the latest industry trends and technologies.

My strengths lie in my analytical thinking, problem-solving abilities, and attention to detail.

I am open to work in cities such as Novi Sad and Belgrade, as well as remotely.

WORK EXPERIENCE

[03/2023 – 04/2023]

.NET Winter Workshop

Levi9 Technology Services

City: Zrenjanin | **Country**: Serbia

During internship we learned about database design, SOLID principles, WebApi, Azure, and as a final task we had to work in a team on a more demanding API. At the end of the internship, we presented our work together as a team in front of the entire company. Tasks that I was working on can be seen on my GitHub account.

[12/05/2024 – 31/05/2024]

.NET Developer Internship

Valcon

City: Novi Sad | **Country**: Serbia

During this internship we worked on a library software project. Authentication and authorization by roles, database via Code-First approach, entire API logic by requests are implemented. In the first two weeks, all interns worked on the same project topic, while the third topic was different for everyone. I worked in a team with another intern, and at the end of internship, we presented together in front of the whole company in English. Project that we were working on can be seen on this link: <https://github.com/MilosMoskic/LibraryProject>

[23/09/2024 – 04/10/2024]

Substitute professor for the subject of computer science

School Center "Nikola Tesla"

City: Vršac | **Country**: Serbia

Classes were held for students in the field of computer science basics, introduction to computer graphics and introduction to electronic business.

EDUCATION AND TRAIN-
ING
